

# Making your own rhythms

Try to imagine every bar of  $\frac{4}{4}$  time as **four little sections**:

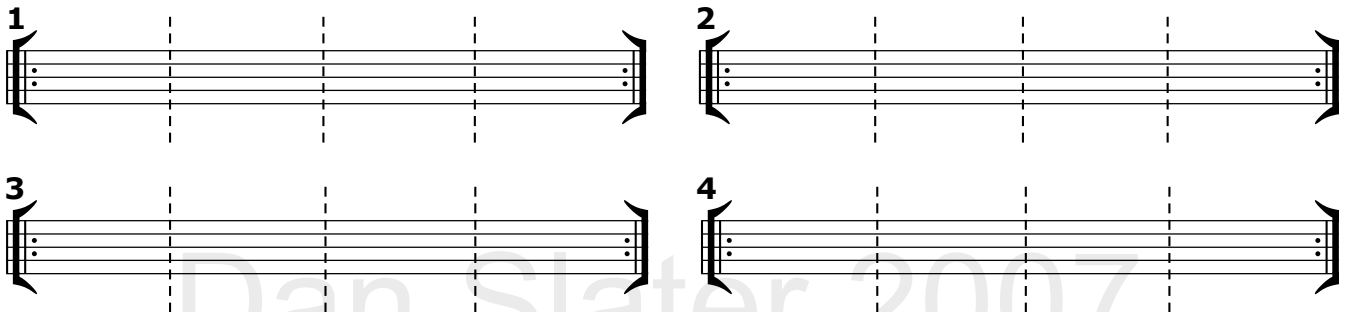

We can fill each little section with any of the following groups of  $\frac{1}{4}$  and  $\frac{1}{8}$  notes or rests.

In theory, we could fit  $\text{♪} \text{♪}$ , but on a drum, this would sound the same as  $\text{♪}$

We could also fit  $\text{♪} \text{♪}$ , but this would equal the same amount of rest as  $\text{♪}$

Choose any combination of these rhythms, to fill the following empty bars:

Create your own 8 bar snare solo - watch the spacing of your notes!
